BOLTING ACCESSORIES

IMPACT SOCKETS

TPS impact sockets are available in a wide range of lengths and wall thickness and with single or double hex openings. Square openings are also available. (6 Point Sockets

- **Sq. Drive Available: ¾", 1", 1.1/2" & 2.1/2"**
- **Sizes in Inch: (1" – 6-7/8")**
- **Sizes in MM: (32mm – 155mm)**

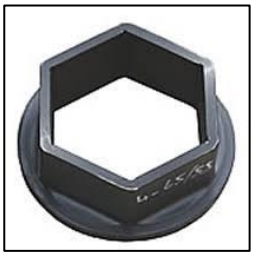

SLUGGING WRENCH

Striking/slugging wrenches are designed to be struck by a hammer on the anvil area, in order to loosen frozen fasteners or to set and tighten fasteners. Anvils are proportional to wrench opening size. Specially selected alloy steel and best suited heat treatment providers, maximum durability for long life and to withstand the serve working conditions.

- **Sizes in Inch: (1.1/4" – 6-7/8")**
- **Sizes in MM: (32mm – 175mm)**

BOLTING ACCESSORIES

HEX REDUCER **HEX BIT SOCKET** **ADAPTORS**

BOLTING ACCESSORIES

REACTION ARM

Every TPS tool includes a standard reaction arm. In addition to this, you can order the below special reaction arms to ensure correct reaction for different applications. These reaction arms include deep socket, double ended arm, blank, nose extensions, etc.

FIXTURED SPINDLE

Multi spindle tightening units are practical and effective solutions to increase productivity thanks to simultaneous and accurate tightening of several screws, bolts or nuts. They can feature two or more spindles, axial compensation to tighten elements at different heights, or variables distances between centers to tighten components having different geometries using the same solution, only by changing spindles positions. Multi spindle units, can be manually operated, therefore used by the operator to perform tightening in vertical or horizontal direction, can also be integrated into automatic assembly lines or automatic workstations, with manual loading of the workpiece.

LONG-MOUTHED COUNTERFORCE ARM

Designed with flexibility in mind - nose extensions for all your hard to reach applications!
A “fixed” Nose Extension has a paddle welded onto the end of the Nose Extension.
A Nose Extension without a reaction arm allows for more flexibility.

THREE-PIECE BASKET

Carrying your TPS Pneumatic Tool around from job to job? Introducing the TPS basket.

We decided to continue our quest for improved ergonomics by not only engineering the world's lightest pneumatic torque wrenches with the highest power-to-weight ratio in the industry, but also by developing the industry's most ergonomic tool basket.

Result in benefits:
Offset handle allows for balanced carrying the tool is stored in the storage pocket
Accessory pocket allows for quick and easy access to additional accessories such as custom reaction arms, snap rings and sockets.
High density Polypropylene construction means the tool basket will stand up to the most demanding conditions while remaining lightweight for easy portability.

DC – AC POWER BOX

Patented Battery + Electric 2 in 1: Power supply 18V battery and international power supply AC 90V-264V, 47-63HZ both apply B-Series series, new advanced technology, more accurate.

Can work with battery or electric power AC supply
